

## Utility Bucket

Utility Bucket - Universal Fit buckets likewise called "slip-on-the-forks" lift truck attachment buckets. These buckets could be utilized together with whichever make and model of extendable reach forklift. If your unit is unable to be matched with a quick-tach unit, another new or used universal fit bucket can be located in its place. Typical universal lift truck buckets attach to blades that are up to 6" wide and are 48" long. Larger fork pockets can be ordered via an account manager upon request.

As universal fit forklift buckets slip onto the forks directly, they stay on the machinery and are less susceptible to destruction. These buckets are also 50 percent deeper than the quick-tach bucket models. This extra space makes them perfect for carrying irregular shaped loads such as tearing off roof trash, elevating roof gravel, moving large debris piles, broken up concrete and backfilling behind walls.

### Quick-Tach Buckets

Quick-Tach Buckets are made for extendable-reach lift trucks. They are made to allow placement of material way beyond the reach of a loader. A hardened beveled cutting blade on both sides and on the leading edge reinforces stability, resistance to wear and tear and provides supreme durability. Quick-Tach forklift buckets are reinforced by scuff bars along the base of the unit which shield it from scratches.

Quick-Tach lift truck buckets can be used to substitute the carriage and forks which weigh between 100-700lbs. When installed, these buckets free up more of the unit's cargo capacity, enabling it to handle heavier and bigger supplies. The Quick-Tach can pour things around 1.5 feet higher because of the shorter depth of its bucket. These buckets are fabricated in a customized fashion to be able to suit the specifications of certain models and makes of lift trucks. It is important to talk to a construction equipment specialist so as to find the customized Quick-Tach bucket solution for all of your requirements.

Lift truck bucket attachments are great for construction work on the ground level. They could be utilized so as to move snow in the northern parts, gravel and also sand. Clean-up on the job location could be even be done with a forklift bucket. The numerous purposes the bucket could complete saves the business much time and money as it does need to completely switch tools or machines and this could help prevent running into overtime.
