

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora started out on a cross country journey in their RV. Recently retired, after spending numerous years working with his brother to manufacture their crane business into an industry leader, John had no idea that momentous trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road trip.

While on their trip, John spent time talking to former business acquaintances whom the Groves stopped to visit along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John uncovered a vast marketplace for a product that could promptly and safely lift people in the air to accomplish maintenance and other construction functions.

Upon returning from their travels, John established a partnership with two friends and bought a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty staff, they built and sold the first JLG aerial work platform. The company incorporates some of the simple design elements of that original lift into existing designs.

JLG forklifts have come a long way since Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Today, the business proudly continues to expand itself into numerous marketplaces globally and develops new products to ensure consumers are capable of being more effective and perform in the workplace within a safer environment.
